

Painting without Masking

Painting without Masking

Painting without masking due to precise laser technology

Advantages:

- ◆ Precise definition of the uncovered area, various shapes with a precision of $\ll 1\text{mm}$
- ◆ Ideal transition from painted to unpainted area, no fraying of coating edges
- ◆ Dry, clean and dust-free removal of paintings and coatings
- ◆ Touch up or reworks are not necessary
- ◆ Better painting conditions, no negative effects from masking
- ◆ Reduced number of working steps
- ◆ Fully automated integration in production lines

Don't waste your time! We are happy to support you.
Tel: +49 (0) 24 21 / 91 50-0 or via e-mail: info@slcr.com

The high precision of modern laser technology allows painting of different surfaces without a time-consuming masking.

Areas free of coatings will be easily created after painting by a quick and precise de-coating. You will save process time and generate higher quality at the same time, even on difficult 3D shapes.

Avoid ~~MASKING~~ and remove paintings or coatings precise with LASER.

Our Portfolio

Process solutions for surface treatment

- ◆ Preparation / Activation
- ◆ Cleaning
- ◆ De-coating / de-painting
- ◆ Material processing
- ◆ Marking

Automation of processes and applications for surface treatment

Manufacturing of Lasers, Lasers systems and customized machines
